[2]][2]. 9.7a 78,168 views 7:25 Exposing Hack Password - Playing Game Insecure World | Dota 2 | Tips & Tricks - Duration: 6:14. Name: Play Game Insecure World (123GP) - Duration: 5:17. You may also like After playing it for a while, I'd personally consider that the game is just unfinished. Even before the mod had time to fully mature, qbsp developed the concept of randomly updating and adding new features to the mod, creating something that is.) [ZUL], qbsp. Brief Description of the Out-Of-Box Experience. The Mod will include: * Killing God Mode (Steps towards becoming God) * God Stats * God Kills (Every drop of blood will count towards your God Kill Counter) * God Kills* God Buffs (You will be Able to choose the God Buffs you want and select them from a panel) * God Kills (Counter etc) * Blood Pool (The More Blood you drop the bigger the Blood Pool will be) * God Buffs (Battle Mods, EXP buffs, Weapon and Armor buffs) * Enemies (You will be able to see how many Enemies you have Killed) * Player Stats (Mage, Fighter, Warrior etc) * Blood Mods (Enemies drops Blood Mods and you can use them to get Blood or XP mods) * Oob Drops (You can pick up Oob Drops when you kill an Enemy) * Stats (In game stats etc) * Misc. (You will be able to see where your backpack is and the speed of your Running speed) The Mod will include also but it is still unfinished: * Deck Panel for Abilities (Customizing your Abilities) * New Abilities (You can also create your own Mod) * Skin Packs * Sound Packs (Just like the regular MOD file it is a simple MP3 file) * More to Come (That i haven't made a screenshot for) * To come (A lot of work for this MOD) * Going into Details (I will try to take some pictures to show you how the MOD works) Inside the mod folders you will find 4 folders, 2.text.gz files, a.po file and a file named meta.yaml with a bunch of information. To install the mod, you will need to unzip the mod folder and place it on a clean install. This mod uses a 8215747faf
